11/17/72 The beginning of a long-delayed repair of the lane, which precludes concentrated work, permits the overdue reading of the last batch of WG clips. Baker's "Bogart" column is great!...Roberts' 10/16 NYT Segretti story has provocative graph about him as a peacenik and an office yet! Too inconsistent, too suggestive of moonlighting, as informant or provocateur. "Free ~~May~~ Huey" yet! Lower, his then associates had this notion. Seems like a longtime spook. How else can one be in the Army and still fly hither and yon?...NYT 10/17, item "smoke detectors". Remember the "ARI" devices in the indictment? Aren't "smoke detectors" rather unusual political supplies?
